"Hi everyone,
I am BS. "I have done this Cloud training course and can say that the instructor is very patient and thorough, extremely knowledgeable, very clear and was able to answer all questions well. I have taken many courses – this was very well done, which I attribute primarily to the instructor and the quality of the training material covered."

"Hi everyone,

I am Arun Yadav. I had joined evision in Feb 2022 for desktop support engineer and got place in HCL with in 3 month after the full guidance and hardwork from mine as well as by evision team. After 6 month again I joined myself in the azure cloud course And this time I have clered the interview of two big company of tcs as well as mindtree as a cloud associate engineer at a package of 6 LPA and & LPA. This is possible because of evision and my presistent hardwork. I thanks to evision team that made it possible

Highly recommend training modules.....

"Hi everyone, My name is Adarsh Singh. I have completed my graduation from Kolkata University. I joined Evision and within 2 months got a job in desktop support for 3.4 LPA. And also enroll myself in Azure cloud Batch with the proper guidance of trainers and management, I started studying cloud as well as working. Then after 8 months, I got a job in Azure cloud Associate Engineer with the package of 6 LPA. This happened because of evision only. I constantly worked hard during this period of time and owe Evisiona lot for this. A big thanks to all the trainers, recruiters and management. Thank a lot.

Hi this is Gopi kumar. I am from Andhra i had completed my B.Tech. in the stream of E.C.E. Evision is the only institute which provides 100% job guarantee program. Because of Evision I had got placed as a Senior Cloud Engineer in Sonata Software. Evision will provide 2 years of real time experience Due to the trust on Evision again I had enrolled to Azure Cloud administrator. Now I had placed as a Senior Cloud Engineer in Sonata Software . Ganesh sir helped a lot in throughout the journey. Evision trainers will Teach us a real time Scenarios as per the company requirements . The Evision HR staff are friendly and they will help us a lot. Believe me if you want an IT job Evision is the best place to start your career

LEARNING METHODS

◉ FLEXIBLE LOCATION

◉ FLEXIBLE SCHEDULE

◉ FLEXIBLE LANGUAGE

Self-Paced Online Training

We provide the flexibility to enable our learners to progress at their own pace allowing them to balance work and other commitments

Live, Instructor live classroom

Since 2015 our learners have been able to join our classrooms remotely. We use modern technologies and tools such as interactive white boards, breakout groups and polls to provide learners with a highly engaging and interactive learning experience. Our NPS scores show that learners receive the same exceptional high quality of training as would be expected from a traditional classroom learning experience.

Live, Instructor led classroom

We are known for our cutting edge training centres. Using a mix of presentations, discussions, and hands on labs. Live classroom courses allow learners to ask questions of our expert AWS instructors and get immediate, practical help

POTENTIAL CAREER OPTIONS

Cloud infrastructure specialists

Cloud administrators

DevOps engineers

Application developers

Infrastructure administrators

Network project engineers

What you'll learn?

Let's take a look at what you'll study and comprehend during this course:

- This certification course will teach you the basics of the cloud and its models.
- You will explore in-depth knowledge of cloud deployment and compute configuration.
- This course provides practical hands-on with popular Cloud platforms like Azure and AWS.
- You will explore creating VM, virtual networks, applying policy, DR, etc.
- You will learn to encrypt and decrypt data in the cloud and understand lifecycle management and Cloud Access Security Brokers (CASB).
- You will learn to control your identity and access management and detect and handle cloud incidents with security operations.

Why Cloud Security Practitioner Course?

Many factors in our lives make us reliant on the cloud. Among the most common applications for "the cloud" include storage space for individual and commercial files, virtual task interaction via shared documents on a single platform, data backup for disaster recovery, and using the software regularly (often called software-as-a-service or SaaS). Cloud security will assist an in-depth understanding of cloud computing and cloud security basics.

Cyber-attacks against cloud storage are standard. Hackers are honing their tactics and procedures for breaking into your cloud storage and stealing your data. Because every user places their data on the same systems and infrastructure, the cloud is hazardous. Your data is vast, exposing it to distributed denial of service assaults (DDoS). A minor breach might also put your organization at risk.

As a result, the market for cloud security is growing, as is the demand for cloud security professionals. Cloud security experts prevent not only data breaches in the cloud but also data loss, legal ramifications, and operational disruption.

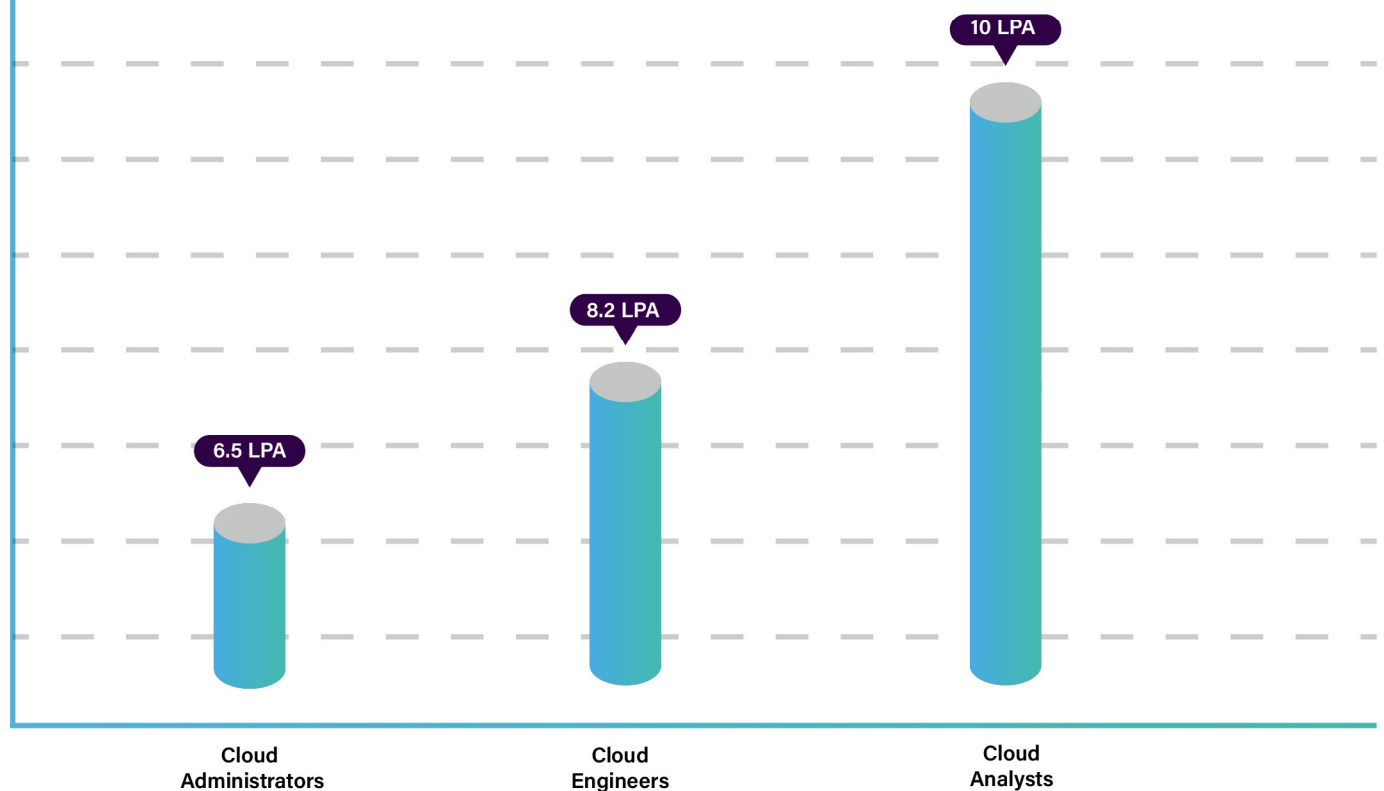

Target Audience

- ◉ Programmers, architects who wish to learn deploying Applications on Cloud
- ◉ Anyone interested in hosting highly scalable, fault-tolerant applications on the cloud
- ◉ Those who want to build their career in Cloud Architectin

Pre-Requisites

- ◉ Knowledge of Networking Concepts & Controls
- ◉ Virtualization fundamentals
- ◉ Familiarity with a scripting language
- ◉ Familiarity with Windows and Linux environments
- ◉ Map business objectives to application/architecture requirements
